

No vehicle may idle for more than...

1 minute

Warming up a diesel engine in winter needs no more than 30 seconds, driving cuts warm-up time in half and is easier on the engine than idling.

Idling contributes to increases in green house gasses into the air and a diminishing ozone layer.

Do you idle while picking up or dropping off your children at school? 10 minutes of idling a day during the school year costs around \$45 worth of gas a year.

SUMMIT COUNTY currently prohibits the idling of unattended vehicles.
